SHIELDED WINDOWS – INSTRUMENT GLASSES
POLARISING FILTERS

Adhesive / Conductive Gaskets

Instrument Plastics Limited is able to offer a wide range of adhesive and conductive gaskets. These include high bond single and double sided adhesive gaskets, adhesive foam gaskets, conductive adhesive, adhesive tapes, and conductive metal and conductive foam gaskets.

These can be supplied separately cut to form or fitted to the optical display filter to ease assembly of the window to the bezel or display.

Instrument Plastics Limited are able to draw on wide expertise and are pleased to advise and assist in the design and selection of the most suitable type of gasket and filter for each individual application.

Instrument Plastics Limited has a policy of continual improvement of products and so reserves the right to change the product specification without notice.
