Optolite™ IPL 650 Plum

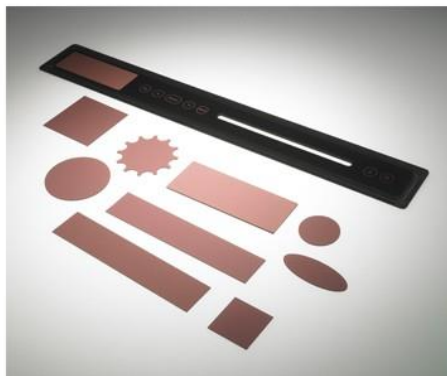

Instrument Plastics Limited are pleased to announce an addition to the Optolite™ range of contrast enhancement filter windows, with Optolite™ IPL 650 Plum.

This colour has been specially formulated to enhance the appearance of green VFD displays by transforming the green characters into white with the background remaining black.

Features include:

- Available with a standard or non-glare finish
- Choice of thicknesses from 0.5, 1.0, 1.5, 2.0, 3.0mm PLUS special thicknesses available on request
- Fabrication to individual requirements from one-off prototypes to full production
- Preparation of artwork & silk screen printing
- Shielded EMI/RFI versions available

Instrument Plastics Limited has a policy of continual improvement of products and so reserves the right to change the product specification without notice.
